NUHS ADVANCED INTERNAL MEDICINE SENIOR RESIDENCY PROGRAMME

The NUHS Advanced Internal Medicine Senior Residency Programme is a two-year comprehensive programme that aims to build on the experience and competencies gained during the basic internal medicine residency training.

Its goal is to equip its graduates with skills and knowledge to provide excellent evidence-based medical care for adult patients admitted into the hospital or seen in the clinic for undifferentiated symptoms or multiple medical conditions.

The two-year programme consists of 18 months of training in general internal medicine and 6 months of elective rotations.

Elective rotations can include any of the following: cardiology, dermatology, endocrinology, gastroenterology, geriatric medicine, haematology, infectious diseases, medical oncology, MICU, neurology, palliative medicine, psychiatry, rehabilitation medicine, renal medicine, respiratory medicine or rheumatology.

As an academic medical centre with strong collaboration with NUS, NUHS offers its residents exposure to top faculty, cutting-edge clinical care and numerous opportunities for research. Our programme allows development of the broad expertise that is necessary to provide holistic and comprehensive patient care in general internal medicine.

Outstanding Features

- Visionary leadership that aims to train "generalists of the future"
- Strong emphasis on delivering high-quality, patient-centered care
- A unique, fast-paced, dynamic learning environment at the Acute Medical Unit
- Flexible and personalised rotation schedule
- Opportunities for academic pursuits due to close ties with NUS

Programme Structure

The two-year NUHS Advanced Internal Medicine Senior Residency Programme consists of 18 months of General Medicine (GM) core rotations in National University Hospital, Ng Teng Fong General Hospital, Alexandra Hospital, NUHS@Home and a Cross-Cluster Rotation. The remaining six months are spent in elective rotations.

The table below features an example of a rotation schedule.

Rotation Schedule (By Month)

Core Rotations (Year 1)					
GM	GM	GM	GM	GM	GM
Core Rotations (Year 1)					
GM	GM	GM	GM	GM	GM
Elective Rotations (Year 2)					
Elective posting		Elective posting		Elective posting	
Core Rotations (Year 2)					
GM	GM	GM	GM	GM	GM

Elective Rotations

Residents can choose from the following rotations available. Elective posting should be minimum one month and not exceed three months:

- Cardiology
- Dermatology
- Endocrinology
- Gastroenterology
- Geriatric medicine
- Haematology
- Infectious diseases
- Medical oncology
- MICU
- Nephrology
- Neurology
- Palliative medicine
- Psychiatry
- Rehabilitation medicine
- Respiratory medicine
- Rheumatology
